Position: Director of Technology
Date of Posting: January 2019
Location: Remote or Posner Center for International Development at 1031 33rd Street, Denver CO, 80205
Hours Per Week: 10-20 hours/week for first month, hourly afterwards
Start Date: Immediately

Who we are: Space for Humanity (S4H) was founded to create a globally-minded world. S4H is the first non-profit gateway to space, a philanthropic organization directly enabled by space technology. Our mission is to democratize access to space by providing all expenses paid trips with Virgin Galactic, Blue Origin, and WorldView -- where anyone, from any walk of life, can apply for an opportunity to experience the Overview Effect: the cognitive shift in awareness that occurs when a human being looks down on the Earth from space. Upon their return, each citizen astronaut will share that experience through a social impact ambassadorship with their communities and beyond. Through this unique program, we believe that we can generate creative solutions to some of the world's most intractable problems.

Position Description: The Director of Technology will work directly with the Executive Director creating and updating the website and application processes.

Your Mission
-   Work directly with the Executive Director to share Space for Humanity mission via website
-   Create steamlined application process for prospective astronauts
-   Assist in the implementation/planning of ongoing collaborations and community events
-   Generate creative ideas and solutions to challenges faced by a global non-profit

What you bring
Ideal candidate is passionate about S4H's mission, curious and open to learning. Ready to take on dynamic work, respectful, and works well in a team environment. Excellent verbal and written communication is essential. Candidate is a self starter + creative. Ideal candidates will be currently enrolled in, or will have completed, a bachelor's or graduate degree program with a preferred background or interest in computer science, website design, or technology.

To Apply
Send cover letter and resume to Rachel rachel@spaceforhumanity.org.
